

Provisional Programme

Somalia: Building stability, accepting reality

Monday 7 – Wednesday 9 February 2010 | WP1078

The international community needs to work with Somalis to build stability in their country and deny space to those who cause harm. The security threats posed to Somalis, the region, and the international community are serious and growing. Security symptoms will not be solved without addressing the cause, in particular chronic and endemic instability. The aim of the conference, hosted by the Foreign and Commonwealth Office is to agree on the international activity needed to deliver long-term political change in Somalia. Discussion will focus on the key policy issues and strategic choices, agreeing what is needed to help Somalia move forward, and how. We will learn lessons from elsewhere on counter-insurgency and state-building operations. The resulting action plan will help build a coherent international approach and maximise the impact of our collective effort.

Objectives:

- To secure agreement on the long-term policy solutions and the framework required to effect real change in Somalia;
- To identify helpful and unhelpful forms of international intervention and therefore to agree how the international community can best provide assistance;
- To develop an action plan to implement the above, including strategic choices and means/methods of implementation.
- To help Somalia move from a ‘country in crisis’ towards normalisation of the Somali ‘space’.
